The Seaport of Emden

Emden is a high-performance allround port, which takes on a leading role in Europe, especially in roll-on/roll-off transshipment. Besides handling brand new motor vehicles, the transshipment of forest products, liquid goods, wind power facilities and other project cargo top the list of activities.

The Seaport of Emden is a transportation hub for the transportation of goods, people and services. We are a major player in the maritime and transport sector and are continuously optimising the port’s facilities and superstructure.

The Seaport of Emden is committed to maintaining, developing and modernising the port’s facilities and superstructure. As a result, we can ensure that we are always up to date and remain a powerful economic force. We are a reliable partner for all those who are interested in operating in the port.

The Seaport of Emden offers a wide range of services to companies. Approximately 500 enterprises, including small and medium-sized businesses, set up shop here. We are a major player in the maritime and transport sector, but we also provide services to other sectors. We are in a strong position to support companies in the region and the entire region and its economic development.

The ports are very much in tune with this responsibility. We care about the entire region and its economic development: The ports are doing so, we are actively designing the future of the ports. We care about the region and its economic development: The ports are doing so, we are actively designing the future of the ports. We care about the entire region and its economic development: The ports are doing so, we are actively designing the future of the ports. We care about the region and its economic development: The ports are doing so, we are actively designing the future of the ports.

The Seaport of Emden is a reliable partner, when it comes to operating a rail infrastructure and sea locks, the mooring of ships inside the port, and organizing the ships’ wastes disposal. In addition, the rail infrastructure and sea locks, the mooring of ships inside the port, and organizing the ships’ wastes disposal.

In Emden we are a reliable partner, when it comes to operating the rail infrastructure und the sea locks, the mooring of ships inside the port, and organizing the ships’ wastes disposal.

In addition, we are a reliable partner when it comes to operating the rail infrastructure and sea locks, the mooring of ships inside the port, and organizing the ships’ wastes disposal.
